

Lechisa Bedasa

Backend Software Developer

Addis Ababa, Ethiopia | +251928290661 | lechisabedo123@gmail.com

Professional Summary

Backend Software Developer with strong experience designing and building scalable APIs and server-side applications using Node.js, Laravel, and Python. Skilled in database design, REST and GraphQL APIs, authentication systems, and backend architecture. Experienced in developing production-ready systems including maintenance management platforms, forum APIs, and language processing applications. Focused on writing clean, maintainable, and efficient backend services.

Backend Technical Skills

Backend Languages: JavaScript (Node.js), PHP, Python

Backend Frameworks: Express.js, Laravel, Nest.js, Flask, Apollo Server (GraphQL)

Databases: MySQL, PostgreSQL, MongoDB

API Development: REST APIs, GraphQL APIs

Architecture: MVC, Service Layer Architecture

Authentication & Security: JWT Authentication, Role-Based Access Control (RBAC)

Tools: Git, Docker (basic), Postman

Professional Experience

Software Developer – Ethiopian Artificial Intelligence

January 2024 – Present

- Design and implement backend APIs and services for web-based applications.
- Build scalable backend systems supporting language processing and automation tools.
- Work with relational databases to design schemas and optimize queries.
- Collaborate with frontend developers and participate in code reviews.

Software Engineering Intern – Ethiopian Artificial Intelligence

March 2023 – August 2023

- Developed backend features for web systems using Laravel.
- Assisted in debugging backend issues and improving system performance.
- Worked with MySQL databases to manage application data.
- Participated in system planning and technical discussions.

Key Backend Projects

Maintenance Request Management System

- Developed a backend system using Laravel to manage company maintenance requests.
- Implemented role-based workflows for employees, managers, and ICT administrators.
- Designed database schema and handled request lifecycle management.

Forum Service API

- Built a scalable REST API using Node.js, Express, Knex, and MySQL.
- Implemented authentication, media management, and discussion features.
- Designed modular architecture with controllers, services, and models.

Afan Oromo Spell Checker (Final Year Project)

- Developed backend logic for a spell checker using Python and Flask.
- Implemented modules for tokenization, error detection, and suggestion generation.
- Prepared linguistic datasets and contributed to system documentation.

Education

Bachelor of Science in Software Engineering
Haramaya University, Ethiopia — July 2024
GPA: 3.92 / 4.0 (Cum Laude)

Languages

Afan Oromo (Fluent), English (Fluent), Amharic (Conversational)
